PROFILE

I am a junior student in Information Communication Technology at AUPP and a senior majoring in English Teaching at IFL, bringing a unique blend of technical and communication skills. I am actively seeking a backend development internship where I can apply my knowledge of Python, JavaScript, Express.js, and cloud computing (AWS) to build scalable and efficient server-side solutions. With hands-on experience in AI-powered projects like PoseUp and a solid foundation in programming and cloud infrastructure, I am eager to contribute to real-world backend systems while continuing to grow as a developer.
